

## Team Lead Development - Full-Stack Developer (m/f/d)

Are you interested in artificial intelligence, big data, disruptive innovation, deep learning and data analytics?

If so, apply now as a

### **Team Lead Development - Full-Stack Developer (m/f/d),**

to have an impact right from the start and actively participate in the development of **coraixx!**

**Coraixx** is a financially strong FinTech company based in Frankfurt and Dresden. We have developed our cloud-based, state-of-the-art applications together with the Fraunhofer Institute. We are changing the processes of front-to-back finance and accounting in order to significantly increase efficiency and quality for our clients. With our OCR technology, AI pattern recognition, and machine learning processes, we are able to automatically process physical documents so that companies can tap new potential. We help prepare companies for the digital future.

**As a Team Lead Development - Full-Stack Developer (m/f/d),** you will coach our team and work with us on various fronts, from front-end integration to microservice-based back-end, in order to create the best experience for our clients and actively shape their digital transformation process. You can expect varied challenges in the areas of artificial intelligence, big data analytics and cloud technologies.

#### **Your concrete tasks with us:**

- You will build and mentor a cohesive team of our 4 amazing developers.
- You make sure that all your team members stay on the path to their goal and support them in the best possible way.
- You solve problems together with your team and produce first-class code for the front-end and back-end in equal measure.
- In code reviews you give and receive valuable feedback.
- You push your code regularly and take responsibility for your CI/CD pipeline as well as a high degree of automation.

#### **This is what distinguishes you:**

- You have at least 3-5 years of practical experience in the implementation of end-to-end solutions using microservices.
- It goes without saying that you will deploy them in the cloud using docker containers and Kubernetes clusters.
- You have a broad understanding of microservices, message-based communication, and RESTful APIs.
- For programming languages, you regularly use Java, Python or C# with the respective frameworks.
- JavaScript or TypeScript are not foreign to you, but are your daily bread.

- Ideally you are familiar with NoSQL databases, Elasticsearch, or RabbitMQ.
- Test Driven Development is no problem for you and your daily aspiration.
- You have team spirit and can communicate very well in English; German is a plus.
- Ideally, you already have some leadership experience within a developer team.
- You have successfully completed a technical or university education in computer science, media informatics, business informatics, or engineering sciences, or you have successfully completed IT training (e.g. IT specialist for application development) and can prove that you have profound experience in software development.

**We demand a lot from you - you also get a lot from us:**

- You work with a unique machine learning technology.
- You can actively shape the company and our processes in our committed young team right from the start.
- Our brand-new office leaves nothing to be desired and is centrally located at Albertplatz in Dresden Neustadt.
- We offer all employees flexible working hours and the possibility of a home office.
- Office mobile phone
- We support you with further education.
- Come to us and learn from real innovators and visionaries: We have clever minds on board and value knowledge transfer. We work and live a proactive, open, honest, and solution-oriented work culture.
- Team events are part of our cooperative culture.
- To make your journey to work fun, we support your mobility with a local transport ticket or job bike.

Are you unsure whether you can fulfil the whole list? Let's talk anyway; there's (almost) nothing you can't learn with commitment. We are looking forward to getting to know you! Just send your CV to Sophie at [recruiting@coraixx.com](mailto:recruiting@coraixx.com).

**Start:** asap

**Location:** Dresden

**Commitment:** full-time
